

IEMA Environmental Sustainability

The IEMA 'All Jobs Greener' suite of courses covers a range of easily accessible and business-applicable subjects, including the main environmental risks and opportunities facing organisations, the importance of resource efficiency and the impacts of pollution, to more strategic discussions that may affect an organisation's ability to do business in the long term. Crucially, the courses also focus on how environmental sustainability can create new sources of value. RRC provides the IEMA 'All Jobs Greener' courses for in-company classroom delivery throughout the world.

IEMA Leading with Environmental Sustainability

This IEMA certified course is delivered as a 4-hour strategy session for those responsible for defining longer-term business strategy.

It aims to support business leaders to re-think, re-position and drive a new approach to value creation through environmental sustainability, providing an opportunity to reflect on the existing approach and set a new strategy for resilience and growth in the short-, mid- and long-term.

The course is designed for senior management teams, executives, investors and board members across all sectors of business who are responsible for business strategy.

Course Content

- What environmental sustainability means for the organisation
- Is the organisation's strategy fit for purpose?
- Which organisations are leading with environmental sustainability and why?
- The implications of complying with environmental law
- What would a new strategy look like?

IEMA Certified Environmental Sustainability Skills for Managers

This IEMA certified course provides supervisors and managers with a strategic and operational overview of environmental sustainability as it affects their specific industry and work area.

This course is ideally suited for supervisors and managers across all sectors.

Course Content

- Main environmental and economic risks and opportunities
- Compliance obligations and business drivers for change
- Main potential impacts on environment and sustainability
- How to improve environmental performance
- Evaluation drivers for change and barriers
- How to apply knowledge and understanding to baseline data to monitor and improve performance
- How to apply knowledge of environmental sustainability across the value chain
- How to demonstrate the importance of implementing resources efficiency
- How to demonstrate how employees can improve environmental performance

IEMA Certified Environmental Sustainability Skills for the Workforce
